**LEGEND**  
**DRY** -- each location is graded on an A – F scale based on bacterial pollution levels present in the surf zone  
**WET** -- grades for days of recorded rainfall and the following 3 days  
**ns** -- no sample taken

Heal the Bay's Beach Report Card<sup>SM</sup> is based on weekly water quality monitoring data provided by the City of Los Angeles' Environmental Monitoring Division and the Los Angeles County Department of Health Services. Data is analyzed as soon as it is made available to us by the public agencies. Beaches are graded on an A–F scale based on the risk of ocean users becoming ill. Samples are analyzed for bacteria—enterococcus, total and fecal coliforms—that indicate biological pollution. A fact sheet detailing the exact methodology used in determining grades for each location is available from the office or on our web site. The report is not designed to measure the amount of trash or toxins found at local beaches.

Heal the Bay

Heal the Bay is a nonprofit environmental organization making Southern California coastal waters and watersheds, including Santa Monica Bay, safe, healthy and clean. We use science, education, community action and advocacy to pursue our mission.

The Beach Report Card is an indication of past water quality and is not a warranty of the current safety of those areas surveyed. Our lawyers are happy.
